

# SLANGMAN AB

*"SlangMan is a good investment. After testing machine we bought it at once. With help from Slangman it goes*

*quick and easy to lower the collector tubes into the drilled hole, you save both money and your back.*

*- Leif Lindkvist, Mälaröarnas Brunnsborrning AB*

*"1 person with Slangman works for 2 persons!"*

Length	1040 mm
Width	465 mm
Height	660 mm
Weight	Appr. 57 kg
Motor data	0.88 kW 220 V 1-Ph with start capacitor/1.1 kW 220 V 1-Ph with start capacitor
Capacity	15 meter/min
Noice level	< 60 dB

## DESCRIPTION

Slangman is made for lowering or pulling up collector tubes (probes) with dimensions 32,40,45,50 and 63 mm. 2- or 4-tube versions.

SlangMan can also be used for pulling water pumps from the ground. SlangMan's development is based on experience from own work with probes.

The machine is handled by 1 person and reduces the time for lowering the collector tube. The low weight of the machine makes it very easy to handle, both during running or transport.

Slangman also reduces the risk for repetitive stress injuries. For offer please contact us on phone or e-mail, see addresses below.
